BEAST WARS

Menu, secrets & password guide

English partial draft v0.31 | Game Boy / Game Boy Color | 15 October 2026

Native 160 x 144 capture, enlarged without smoothing.

1. Getting around

Use the **D-pad** to move the selection and **A** to confirm. **B** goes back where the screen allows it. Both white/red markers identify the highlighted main-menu entry.

Menu	What it opens
SINGLE	Choose 1PLAYER for CPU battles or 2PLAYER for linked play, then select a fighter.
TEAM	Choose player count, faction and three team members. Each defeated member is replaced automatically.
QUICK DRAW	Character selection for the quick-draw battle mode.
PASSWORD	Enter the three-key codes on page 3.
OPTIONS	Timer, skill, language setting, printer shade, move lists and sound test.
EXTRAS	Crystal menu for minigames, stickers and Profiles. More crystals appear as features unlock.

This guide uses the patch labels Cybertron / Destron and Convoy / Megatron. Older guides may use different spellings.

Options & Extras

2. Options

Setting	How to use it
TIME	Change the round timer with Left/Right.
SKILL	EASY, NORMAL or HARD. TSU-YO-I adds EXPERT.
KANJI	Selects the original Japanese display variant. Both have translated paths; some scene or wording variants differ.
PRINT	Printer shade: V.PALE, PALE, NORMAL, DARK or V.DARK.
MOVE LIST	Hold START and press Left/Right to change fighter. SELECT requests printing. A+B together returns. Upper and lower move sets correspond to the two forms.
SOUND TEST	Select music or sound effects using the BGM / S.E fields.

3. Extras crystals

A fresh game offers **Punch and Go!** and **Profiles**. Right reaches Profiles from the initial crystal. Locked minigames become selectable after their rewards/passwords are unlocked.

Feature	Purpose
Punch and Go!	Use A to punch the crystal out of the rock.
Guard and Go!	Guard flying rocks using the directional instructions.
Guard and Go! 2	A stricter guard challenge; a missed rock ends the attempt.
Run, Beast!	Move with the D-pad and avoid holes on the way to the goal.
Fight, Beast!	Move with the D-pad and attack with A in a scrolling shooting game.
Make Stickers	Choose a design; SELECT requests printing.
Profiles	Character biographies, move explanations and numbered tutorials. A opens an entry; B exits.

Physical printing needs a compatible printer. Linked multiplayer and printer hardware were not tested for this guide.

Password reference

Select syllable keys, not individual English letters. Move to each on-screen key and press A. After three keys, press **START** to submit. A on the result returns to the menu. B deletes an entered key.

~ is the dedicated long-vowel key. **XT** is small tsu. **[blank]** means the empty key. Hyphens below separate keys only. GE-SU-TO uses three keys, not six.

4. Directly checked codes

Exact patch keys	Japanese code	Result
GE-SU-TO	げすと	Star Upper becomes available.
TE-MI-SU	てみす	Artemis becomes available; Moon is associated with her character.
RI-~-MU	り〜む	Starscream selectable in Fight, Beast!
BI-[blank]-BI	び び	BB selectable in Fight, Beast! Two BI keys alone do not work.
GA-~-DO	が〜ど	Unlock Guard and Go!
TSU-U-~	つう〜	Unlock Guard and Go! 2.
HA-SHI-RE	はしれ	Unlock Run, Beast!
U-TE-XT	うてっ	Unlock Fight, Beast!
SHI-~-RU	し〜る	Unlock Make Stickers.
E-N-DO	えんど	Enable hidden profile/ending access with Left+A.
TSU-YO-I	つよい	Add EXPERT skill.
O-SHI-RI	おしり	Show the gorilla comic scene.
TA-KA-RA	たから	Show Play is culture; first step of the combined unlock on page 4.
KA-RA-~	から〜	Show Color Test.

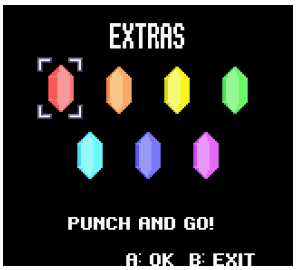

These are original game passwords, not cheat-device codes. Re-enter unlocks after a fresh reset; do not rely on battery-backed saving.

Hidden features

5. Combined unlock

1. Enter **TA-KA-RA** and submit with START.
2. Press A on the slogan screen to return.
3. Open PASSWORD again and enter **ZE-N-BU** (ぜんぶ).
4. Submit, then press A after the confirmation. All seven Extras crystals become available, along with character/feature unlock flags.

Order matters: ZE-N-BU alone was rejected on a fresh boot. The combined sequence and the flags after returning matched the original Japanese game.

6. Profiles, endings and hidden lessons

After E-N-DO, open **EXTRAS > Profiles**. Highlight a character name, hold Left and press A for its hidden ending path. The same gesture on the first regular tutorial entry opens the hidden Ultimate lesson. That lesson entry was checked using normal password and roster inputs.

Star Upper and Artemis passwords also expose additional roster/tutorial material. Navigate the displayed roster; hidden entries can occupy different positions when only one character is unlocked.

7. Verified extra fighters and Soft Dip

With Fight, Beast! and its extra characters unlocked, highlight **Scuba**, hold Select, then press A for **Ikard**. For **Scylla**, highlight Lio Convoy instead, hold Up+Select, then press A. For the bee fighter labeled **D-J**, hold Down+Select and press A from Lio Convoy. Keep the held buttons down until selection is accepted. These sprites and attacks were checked in the original and English builds, in color and grayscale.

It also associates passwords with minigame scores and harder clears. Exact score thresholds and secret-fighter encounter conditions have not been established locally, so use the checked codes above.

Soft Dip: open OPTIONS, highlight SOUND TEST, hold Left first, then press A while continuing to hold Left. Select SOFT DIP and press Right to enter the switches; Left/Right chooses a bit, A toggles it, and B returns. The first two switches unlock Star Upper and Artemis. Other switches change original game behavior and are optional. Simultaneous Left+A can fail: establish the Left hold before A.

Checks & references

8. Team Mode coverage

One-player wins and losses were exercised for both factions in color and grayscale. Members advance automatically after a KO. A completed team match shows the winner sequence and TEAM BATTLE transition, then returns to faction selection.

Independent mGBA captures: returned faction selection (left) and a new grayscale rematch (right).

No new untranslated Japanese was found in those Team Mode paths. A second emulator repeated the idle-loss route and rematch entry in both display modes. Winning strategies used buttons and save-state retries; health and gameplay data were not edited.

Limits: linked two-player play, physical printer output and a complete human playthrough remain pending. Independent checks now cover character profiles, all eleven tutorials, ending speeches, scrolling epilogues and credits in both display modes and both text settings. Password-replay coverage is separate from the earlier automated battle-clear routes.

9. Sources and edition

Primary reference: the original Japanese game and current English build, native button tests, original-vs-patch password flags, retained screenshots and the project translation workbook.

Cross-check: GalFord / pokeeiyuu, Move List and Guide v5.0 (2001), GameFAQs. Consulted for older menu terminology, hidden-feature reports and password associations. Its prose and translations are not reproduced.

Cross-check: GameFAQs community Cheats, Codes and Secrets. The combined-password sequence and held-Left Soft Dip entry were tested locally. Accessed 15 October 2026.

Prepared with AI assistance and checked against captured game screens and recorded tests. This unofficial, noncommercial companion claims no ownership of original game names, characters or artwork, which remain with their respective rights holders. No ROM is included.

Crystal unlock progression

The seven Extras crystals are unlocked through original game passwords. Earning a password and entering it are separate steps: note the result-screen code, return to PASSWORD, select its three keys and press START.

Crystal / feature	How to earn access	Password keys
Punch and Go!	Available from the start.	None
Profiles	Available from the start.	None
Guard and Go!	Achieve the TOP result in Punch and Go!: match or exceed the current record. The initial TOP is 30.	GA-~-DO
Guard and Go! 2	Guard all 100 rocks in Guard and Go! for a perfect 100% result.	TSU-U-~
Make Stickers	Match or exceed the displayed TOP in Guard and Go! 2. The initial record is 100; a higher record set during the session becomes the target.	SHI-~-RU
Run, Beast!	Clear SINGLE on EASY to receive the running-game password in the ending newsletter.	HA-SHI-RE
Fight, Beast!	Reach the goal in Run, Beast! in under 20 seconds. A 20-second result does not give this reward.	U-TE-XT

Two routes through the crystals

Minigame route: Punch and Go! then Guard and Go! then Guard and Go! 2 then Make Stickers.
Single-player route: SINGLE on EASY then Run, Beast! then Fight, Beast!

Enter each earned password to open its crystal. The passwords can also be entered directly without earning them first. For all seven crystals immediately, use the TA-KA-RA then ZE-N-BU sequence on page 4.

Record conditions and verification

The game accepts a tie with the current TOP for the Punch and Guard 2 reward dialogues. Initial records are session defaults; compare against the TOP displayed in your current game.

Original-ROM result branches were checked around the boundaries: Punch 29/30/31, Guard 99/100, Guard 2 99/100/101/150, and Run 19/20 seconds. These were controlled score-parameter tests of the native result logic, not claims of human high-score performances. The English patch retains this gameplay logic unchanged.

The older GameFAQs guide reports 150 for the sticker reward. The original game instead selects the reward at its current TOP, initially 100. The source checks take precedence here. The EASY-clear route also agrees with the ending newsletter mapping and the older guide.
